Specification Sheet

The SS-S2-BD erosion control blanket is a double-netted blanket made with biodegradable natural jute fiber netting and contains 100% agricultural straw cuttings. The weed free agricultural straw is stitched between both sides of the netting at a rate of .5lb. /yd². The spacing of the thread is 1.5 x 1.5 inches per stitch. The netting opening on both sides of the net is ½ x 1 inch. At least 80% of the straw cuttings measure 3 inches in length. The netting and stitching material has a lifespan of approximately 9 months after being rolled out depending on light, moisture, and other environmental conditions. Each roll has a distinguishing tag explaining what the product specifications are.
